FL-iCAN! *is people of goodwill and faith taking action together where health and environment face climate change.*

Is the environment
where you live healthy?

Is the air breathable, the water drinkable,
the land dry and toxic free?

Is the climate making things worse?

Florida's urban corridors, fresh water
lagoons, and coastal communities
are under stress.

Our health is threatened.
We must address the changes to be well.

Join faith and community partners
in two days of mutual learning
and network building.

Come, share what you have learned!
